DRAFT — UNOFFICIAL — NOT FOR OPERATIONAL USE

AGENT DOCTRINE

These documents are the doctrinal reference layer for architecture, ontology, pipeline, and identity work in the ODT workspace.

They are not executable agent definitions. Use these docs for: - CDA-derived operating principles and constraints - Semantic and ontology modeling guidance - Ingestion and entity-resolution doctrine - Shared language across architecture, pipelines, products, and AI work

CONTENTS

- [CDA_AGENTS_CORE_PRINCIPLES.md](#) — cross-cutting bedrock principles (universal)
- [CDA_AGENTS_ONTOLOGY_ENGINEER.md](#) — specializes the semantic layer
- [CDA_AGENTS_ENTITY_RESOLUTION.md](#) — specializes governed identity work
- [CDA_AGENTS_INGESTION_INTEGRATION.md](#) — specializes pipeline execution against the ontology contract

PLACEMENT

This material is cross-layer doctrine. It is broader than the pipeline layer and applies to architecture, pipelines, products, and AI work equally.

HIERARCHY

<code>CDA_AGENTS_CORE_PRINCIPLES.md</code>	← universal bedrock
├─ <code>CDA_AGENTS_ONTOLOGY_ENGINEER.md</code>	– specializes Principles 3, 7, 8, 9, 10, 11
├─ <code>CDA_AGENTS_INGESTION_INTEGRATION.md</code>	– specializes Principles 2, 4, 8, 10, 12
└─ <code>CDA_AGENTS_ENTITY_RESOLUTION.md</code>	– specializes Principles 8, 5, 12

If a specialized document ever conflicts with a core principle, **the core principle governs.**
