## COURSE SYLLABUS — T3-F: MSC FORCE MULTIPLIER

### MAVEN SMART SYSTEM (MSS) — USAREUR-AF

Field	Detail
<b>Level</b>	T3-F (MSC Force Multiplier — Unit Data Trainer Certification)
<b>Duration</b>	Half day (4 hours)
<b>Prerequisite</b>	TM-20, Builder (Go on file); unit commander nomination
<b>Audience</b>	MSC-level personnel designated for local TM-10 training sustainment: data NCOs, S6 staff, unit data stewards
<b>Format</b>	Instructor-led walkthrough + teach-back evaluation
<b>Location</b>	MSC site (typically delivered during MTT rotation)

**BLUF:** T3-F certifies Unit Data Trainers (UDTs) to deliver TM-10 independently at their unit, proctor TM-10 exams, and report training status to C2DAO. Half-day course: learn the materials, prove you can deliver, get certified.

### LEARNING OBJECTIVES

#	Objective
1	Navigate the TM-10 document set: course content, lesson plans, syllabus, exercises, exams, and T&EOs
2	Use the TM-10 lesson plan to deliver a block of instruction
3	Administer TM-10 pre-test and post-test: timing, answer key handling, scoring
4	Score a T&EO correctly: identify critical items, make Go/No-Go decisions
5	Deliver a TM-10 block to standard in front of an audience

## SCHEDULE

Time	Block	Duration	Method	Content
0800–0830	1	30 min	Brief	UDT role, authorities, limitations — what you can and cannot do
0830–0930	2	60 min	Walkthrough	TM-10 document set: lesson plans, exercises, exams, T&EOs — where each lives, how to use the lesson plan, pre-course checklist, exam admin, reporting
0930–0945	—	15 min	Break	
0945–1030	3	45 min	Walkthrough	Evaluation: T&EO scoring, critical items, Go/No-Go determination, mode transition ("I cannot provide assistance"), No-Go procedures
1030–1145	4	75 min	<b>Eval</b>	<b>Teach-back:</b> each candidate delivers 1 TM-10 block (10–15 min); evaluated on technical accuracy and lesson plan adherence
1145–1200	5	15 min	Brief	Certification: UDT designation paperwork, sustainment requirements, C2DAO contacts

## GO CRITERIA

T3-F Go requires: - **Teach-back:** satisfactory on technical accuracy (content is correct) **and** lesson plan adherence (follows the plan, uses check-on-learning questions)

T3-F Go authorizes the candidate to receive the UDT designation and begin delivering TM-10 independently.

## NO-GO REMEDIATION

Outcome	Action
<b>No-Go — technical accuracy</b>	Candidate reviews TM-10 course content for the failed block; re-attempts teach-back at next T3-F iteration or scheduled remediation event

Outcome	Action
<b>No-Go — lesson plan adherence</b>	Candidate reviews lesson plan walkthrough procedures; re-attempts at remediation event

## KEY TIPS

Risk	Guidance
Lesson plan deviation	Follow the plan as written. If you think something is wrong, deliver as published and report to C2DAO after.
Evaluation assistance	The moment you help a trainee during evaluation, the evaluation is void. Announce the switch clearly and do not assist.
Classification block	Block 6 is the highest-stakes TM-10 block. Hard No-Go item. Walk through classification rules slowly.
Know your limits	If a request exceeds your authority, say so and connect with C2DAO.

## CONTINUATION

T3-F graduates serve as Unit Data Trainers. The path for UDTs who want to become full instructors: 1. Continue serving as UDT (build teaching experience) 2. Complete TM-30 if not already done 3. Seek C2DAO selection for T3-I (Instructor Certification) 4. Complete T3-I Phase 1 + Phase 2

T3-F is not a prerequisite for T3-I, but T3-F experience is valued in the selection process.
